

The Focus

\$5,200 A YEAR

You name the area your district is already working on. Every three weeks we send a tool built for it, ready to use, with a printable version underneath. Thirteen across the school year, plus two virtual sessions with your leadership team to read the data together. Nothing new goes on the plate. The initiative you already chose finally comes with something practical behind it.

WHAT YOUR STAFF GET

TOOL 5 OF 13 · STUDENT BEHAVIOR

The 2-minute reset

Bring a student back without sending them out. Four lines to say, and the three moments to use them.

- 1 Move beside them, not in front of them.
- 2 Name what you see, not what they did.
- 3 Give them the two-choice out.
- 4 Walk away first.

The first time you try this, it may not work. Most students test it once before they trust it. Run it three times before you decide.

Where are you with this?

In my plans this week

Skipping this one

I want help with this

One tap. No follow-up survey.

The tool is in the email itself, with a printable one-page version to download. Built to TDI content standards: numbered steps, print-first, copier safe.

WHAT YOU SEE, AFTER EVERY TOOL

Lincoln Middle School · tool 5 report · 42 of 51 staff responded

In my plans this week68%

Skipping this one24%

I want help with this8%

Where help is piling up

- Re-entry after a suspension — 14 asked
- The parent call that doesn't escalate — 9 asked
- The 2-minute reset — 4 asked

Clustered in 6th grade and among staff in years one to three.

One thing to do next

Tool 4 got skipped by 41% of your staff, well above your average, and they told us why. Re-entry is the piece they can't do. Move it up from January to December, and hold the reset corner for spring.

Written from your response data. Nothing for you to assemble.

Objectives

- I can put real tools behind the initiative I already committed to
- I can see whether my staff are actually using what we send
- I can catch a focus that is not working in November instead of June
- I can sit down twice a year with someone outside the building and decide what to change

Every three weeks, on dates you already have

Thirteen tools across the school year, sequenced to your focus area. All thirteen dates are set when you sign, so you know in August when the March tool is landing.

SEP 8	SEP 29	OCT 20	NOV 10	DEC 1	BREAK skipped	JAN 5
JAN 26	FEB 16	MAR 9	MAR 30	APR 20	MAY 11	JUN 1

Example calendar. Monday mornings, in your time zone, never the same day as a Pulse check-in. The cadence routes around your breaks rather than sending into an empty building.

THE THREE WEEKS AROUND EACH TOOL

Monday The tool goes out. In the email body, printable underneath.	Thursday One resend, to people who didn't open it. New subject line, no mention of the miss.	The following week Your report. What landed, what got skipped, where help is piling up, one suggested move.	Day 18 Responses close, before the next tool lands. Then it starts again.
--	--	---	---

WHAT THE THREE ANSWERS ARE FOR

In my plans this week Planned-use rate. The headline number, tracked across the year and reported by grade, role and building.	Skipping this one The underrated one. A tool most of the building skips tells you the focus is wrong or the tool is, and it tells you in November instead of June. Skipping is never framed as a failure, because a skip that costs a staff member something is a skip you stop hearing about.	I want help with this Volume and clustering of requests, which is where next year's focus usually announces itself. Related tools come back on the screen straight away.
--	--	--

THE RESEND, THREE DAYS LATER

MONDAY · THE ORIGINAL Tool 5: the 2-minute reset One page. Four lines to say, and when to say them.	THURSDAY · TO PEOPLE WHO DIDN'T OPEN IT Four lines to bring a student back Same tool, new subject line, and one line added at the top: <i>still here whenever you want it.</i>
--	---

No "in case you missed it," no reminder framing, no counter of how many people already responded, no deadline. There is no deadline. A leader never sees who needed a second send.

All figures shown are examples.

What your staff are never asked to do

No follow-up survey, ever	No login, no app, no new platform	No meeting, no PD day, no new priority	Nobody is identified as having skipped or asked for help
---------------------------	-----------------------------------	--	--

How it runs

You name the focus once. Everything after that is built, sent and reported without anything landing on your plate, apart from two conversations a year where we go through it together.

You name the focus area

- One choice at signing, from the work your district already committed to
- All thirteen tools are built to it, sequenced to the school year
- One change permitted, at the semester break, with the trend reported in two segments

We build and send

- Delivered by email with the tool in the body and a printable version to download
- Every tool one page, numbered steps, print-first, copier safe, legible at phone width
- One resend to non-openers, three days later, with no reference to the miss
- Nothing to run after the tools are built. Delivery and reporting are automated
- One onboarding form to start, and no kickoff call

Two sessions with your leadership team

- **Mid-November**, after four tools. What the data says, what is getting in the way, and one thing we change. Early enough that changing it still matters
- **Early March**, the week your proof report lands. We walk through it, decide which two numbers to lead with for a board, and name where next year's focus is already showing up
- 45 minutes each, both dates booked at signing. One page back from us within two days, never homework for you
- These two conversations are your whole time commitment for the year

How it is measured

Three numbers, and none of them require you to assemble anything.

- **Planned-use rate** across the year, by tool and by group
- **Skip rate**, which flags a tool or a focus that is not landing
- **Help requests**, by volume and by where they cluster

An example year of tools

District focus: student behavior.

- Naming the behavior without naming the kid
- The reset corner that isn't a punishment
- The 2-minute reset
- What to do when nothing is working
- Re-entry after a suspension
- The parent call that doesn't escalate
- The student everyone has given up on

Seven of thirteen shown.

However you start, you have the proof before the budget conversation

Early March: one page, where you started against where you are, formatted to forward

In hand before April and May budget talks, not during them

June: the full year, what changed, and what carries forward

Contracts run January to December or August to July, two summer months off
